

Festive Vape Offers You Shouldn't Miss

There is a point in December when the air changes. The evenings feel sharper, your breath hangs in the cold, and town centres glow with fairy lights and shop windows. If you vape, that is when the habit turns into a bit of a ritual. A quiet vape on the walk home. A few slow pulls after Christmas dinner. A new flavour while watching telly and trying not to fall asleep before nine.

We have been through enough kits and liquids to know that Christmas is the best moment to sort your setup. You want something reliable in your pocket, something that actually suits the way you vape, and if you can grab it in a bundle that saves a bit of money, even better. This year, Tidal Vape have put together a Christmas range that gives proper choice. You have [pod kits](#), [sub ohm kits](#), [nic salts](#), [high VG bottles](#) and even a fresh battery for the serious tinkerers.

If you are buying for yourself, it is a good excuse to upgrade. If you are buying for someone else, you can pick a bundle that actually gets used rather than ending up in a drawer by January.

What Tidal Vape are doing for Christmas

Tidal Vape have a dedicated [Christmas vaping bundle](#) page that runs through their festive kits and gift friendly offers. The focus is simple: pair solid devices with nic salts or high VG liquids so you do not need to build your own bundle.

Here is what stands out from the overall Christmas setup:

- A line up built around four main kits: [Oxva Xlim Pro 3](#), Drag X3, Drag S3 and [Geek Vape Legend 5](#)
- A choice between Vortex Bar nic salts and high VG liquids in different bundles
- A Prism 18650 battery sitting alongside the kits as a handy extra or stocking filler
- All offers grouped on one page so you can compare easily rather than hunting across the site

It feels less like a random sale and more like a small Christmas menu for vapers.

Oxva Xlim Pro 3 Vape Kit With 10 Vortex Nic Salts

The [Oxva Xlim Pro 3 bundle](#) is the most approachable of the lot. It is a neat pod kit that

works well for mouth to lung vaping, paired with 10 bottles of Vortex nic salts so you have a decent supply from day one.

Why this bundle makes sense for new and steady vapers:

- Ideal for anyone moving from cigarettes to vaping and wanting something familiar in the hand
- Vortex nic salts give a smooth draw with a stronger nicotine hit than standard freebase liquid
- Pod based design keeps things simple, with fewer parts to worry about
- Makes a tidy gift because it looks complete as a set, not like a bare device on its own

If a mate asked me which Christmas kit to buy as a first proper vape, this is the one I would point at.

Drag X3 Vape Kit With Prism Battery And 2 High VG 100 ml

The first [Drag X3 bundle](#) is aimed at people who like a bit more power and vapour. You get the Drag X3 device, a Prism INR18650 30H battery and two 100 ml bottles of high VG e liquid.

Why this Drag X3 high VG bundle works:

- High VG liquid pairs nicely with the Drag X3 for thicker clouds and fuller flavour
- The included Prism 18650 battery means you are not stuck hunting for a separate battery on Christmas Eve
- Two 100 ml bottles will last most people well beyond the holidays
- Suits vapers who want a step up from small pod systems without going to a huge box mod

This is the bundle I would call the all rounder. Enough power for proper sessions, still reasonable to carry and generous liquid included.

Voopoo Drag X3 Vape Kit With Prism Battery And 10 Nic Salts

The second [Drag X3 bundle](#) swaps the high VG bottles for 10 nic salt bottles. Same device. Same Prism battery. Different vaping style.

Who this nic salt Drag X3 set is for:

- Vapers who like the feel of a stronger nicotine hit but still want the look and build of a larger kit
- People who mix and match styles, using nic salts in the day and high VG in the evening
- Anyone who prefers having a variety of flavours in smaller bottles rather than two large bottles of one profile
- Smokers moving over who want a device that will last them beyond the beginner stage

Between the two Drag X3 bundles, you can choose your lane. High VG for clouds, nic salts for that sharper lift.

Voopoo Drag S3 Vape Kit With 2 High VG 100 ml

If you like the idea of high VG but prefer a slightly different feel in the hand, the Voopoo [Drag S3 high VG bundle](#) is worth a look. It comes with the Drag S3 device and two 100 ml high VG e liquids.

Reasons to consider the [Drag S3](#) high VG bundle:

- More compact feel than some bigger dual battery setups while still providing solid output
- Two big bottles of high VG that match the device and save separate shopping
- Suitable for direct lung vaping with a focus on flavour and vapour thickness
- Great for evenings in, gaming sessions or long catch ups where you do not want to refill often

If you want a Christmas kit that feels modern and streamlined, this fits that space neatly.

Voopoo Drag S3 Vape Kit With 10 Nic Salts

The [Drag S3](#) also comes in a nic salt bundle, with the device paired with 10 nic salt bottles instead of high VG shortfills.

What makes the Drag S3 nic salt bundle appealing:

- Good option for those who want the Drag S3 form factor but prefer smaller, stronger nic salt bottles

- Allows you to try several flavours over the Christmas period
- Handy for ex smokers who want a tighter, more satisfying hit from their vape
- A nice middle ground gift between a slim pod kit and a bulky sub ohm device

If I were buying a Christmas present for someone who already vapes disposables but wants a proper refillable kit, this Drag S3 nic salt bundle would be high on the list.

Geek Vape Legend 5 Vape Kit With 2 High VG

Out of all the Christmas offers, the [Geek Vape Legend 5 bundle](#) is the one that speaks to serious vapers. You get the Aegis Legend 5 kit along with two bottles of high VG e liquid.

Why the Legend 5 high VG bundle stands out:

- Designed for vapers who are comfortable with sub ohm vaping
- High VG bottles match the coil style for dense vapour and bold flavour
- Feels robust in the hand and suits people who want something long lasting
- Makes sense as a main device for 2026 rather than a short term Christmas pick

This is not the one I would give to a first time vaper. It is the one I would buy for myself as a gift that I know I will use daily.

Prism INR18650 30H Battery as A Christmas Extra

Also on the Christmas page is the [Prism INR18650 30H Battery](#). It might not sound as exciting as a new kit, but any experienced vaper knows a good spare battery can be a life saver.

Why the Prism battery matters:

- Perfect stocking filler for anyone who uses a device that takes 18650 cells
- Gives you a safe, fresh cell instead of an ageing one
- Handy backup for long days out when you do not want to carry a charger
- A practical add on if you are gifting one of the Drag X3 or similar kits

If you know a vaper who always complains about battery life, this is for them.

Nic Salts Versus High VG In The Christmas Bundles

A big part of these [Christmas vape deals](#) is the choice between Vortex nic salts and high VG e liquids. Each bundle leans strongly toward one style.

Here is a clear breakdown:

- [Nic salts](#)
 - Smoother inhale even at higher nicotine strength
 - Often better for mouth to lung vaping
 - Good for ex smokers or anyone who wants fewer puffs
 - Used in the Xlim Pro 3, [Drag X3 nic salt bundle](#) and [Drag S3 nic salt bundle](#)
- [High VG](#)
 - Thicker vapour and deeper flavour
 - Designed for sub ohm coils and direct lung vaping
 - Better for cloud production
 - Used in the Drag X3 high VG bundle, Drag S3 high VG bundle and [Legend 5 bundle](#)

Choosing the right liquid type is as important as choosing the right kit.

How To Choose Your Bundle This Christmas

With seven bundles and products on sale, it helps to simplify your choice.

- If you are a complete beginner or someone who vapes lightly
 - Oxva Xlim Pro 3 with 10 Vortex nic salts
- If you want a main kit that covers daily use
 - Drag X3 or Drag S3 depending on which shape you prefer, then choose nic salts or high VG
- If you want a powerful device for bold flavour and thicker vapour
 - Geek Vape Legend 5 with high VG
- If you already use an 18650 device
 - Add a Prism battery as a safe and useful extra

Once you match your routine to the right bundle, the choice becomes clear.

Final Thoughts From Tidal Vape

Christmas can be fast and noisy. Having a vape that works every time feels like a quiet moment of control in the middle of it all. [Tidal Vape's Christmas](#) line up is not about throwing random kits together. It is built around strong devices, matched liquids and a battery that make sense as a set.

Here is the quick recap:

- [Oxva Xlim Pro 3 with 10 nic salts for new and light vapers](#)
- [Drag X3 with high VG for balanced cloud friendly vaping](#)
- [Drag X3 with nic salts for stronger hits and flavour choice](#)
- [Drag S3 with high VG for compact but capable cloud chasing](#)
- [Drag S3 with nic salts for ex disposable users moving up](#)
- [Geek Vape Legend 5 with high VG for full power vaping](#)
- [Prism 18650 battery for anyone who values a safe spare](#)

If you want to upgrade your kit before the new year or wrap a present that will actually be used, these bundles cover every type of vaper. Pick the one that matches your style, enjoy your Christmas routine and take that first satisfying inhale on a clear winter night.
